

QUALITY POLICY

McGregor GeoScience Limited's objective is to be recognized as a leader of the marine services industry and the marine research industry. We will accomplish this objective by continuously improving our performance through proactive partnerships with the public, fellow employees, contractors and our suppliers.

We will provide services which consistently meet or exceed agreed upon requirements of our customers in a safe, timely, efficient and environmentally sound manner.

We will create a work environment which encourages the ongoing dedication of employees to achieve their maximum potential as individuals and as team members in improving productivity and the quality of services.
